4. Group II is drawn to a method for modifying a physiological system. Group II does not require the features of Group III which requires a polymeric resin, a linear elastomeric polymer and a cross-linked elastomeric polymer being 30-80% cross-linked.

5. Group I does not require the pharmacological agent to modify the reproductive or immune system as required by Group II.

Art Unit: 1615

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application.
